DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanimoto et al. (6,315,456).

Regarding claims 1-6, Tanimoto et al. discloses a rolling bearing (see fig. 4) comprising inner and outer members (1, 2) rotatable relative to each other, a plurality of rolling elements (3) rotatably interposed between said inner and outer members and a retainer (4), made of a synthetic resin (polyamide 46, polyphenylene sulfide, or PEEK) containing glass or carbon fibers within the claimed ranges, rotatably holding said rolling elements. Tanimoto et al. is silent as to the properties of the resin composition of the retainer.

However, it would have been obvious to make the retainer out of a resin having the claimed properties since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. Moreover, it would be inherent for the claimed materials having the specified glass or carbon composition to have the properties as described in Claim 1.

Art Unit: 3682

Regarding claim 7, Tanimoto et al. discloses a retainer prepared in such an arrangement that the entire inner circumference acts as a mold gate.

Response to Arguments

3. Applicant's arguments, see Reconsideration, filed March 5, 2003, with respect to the rejection(s) of claim(s) 1-7 under the Purecoat publication have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Tanimoto et al. (6,315,456).

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julie K Smith whose telephone number is 703-305-3948. The examiner can normally be reached on Monday-Friday, 8-5:30, (Every other Friday off).
